

**Table 4-3  
Components of the Groundwater Remedial Alternatives**

<b>ALTERNATIVE</b>	<b>KEY COMPONENTS</b>
<b>ALTERNATIVE GW-1 – NO FURTHER ACTION/INSTITUTIONAL CONTROLS</b>	<ul style="list-style-type: none"> <li>• Institutional controls (water use restrictions)</li> </ul>
<b>ALTERNATIVE GW-2 – LONG-TERM MONITORING</b>	<ul style="list-style-type: none"> <li>• Natural attenuation of groundwater</li> <li>• Groundwater monitoring</li> <li>• Institutional controls (water use restrictions)</li> </ul>
<b>ALTERNATIVE GW-3 – GROUNDWATER PUMP AND TREAT</b>	<ul style="list-style-type: none"> <li>• Institutional controls (water use restrictions)</li> <li>• Groundwater removal with extraction wells (overburden and bedrock) and extraction trenches</li> <li>• Groundwater treatment (reverse osmosis, microfiltration, and GAC)</li> <li>• Infiltration of treated groundwater</li> </ul>
